

### Clinical Placements Overview

Students complete seven clinical placements during Years Two, Three, and Four of the UBC Midwifery Program. Several combinations of clinical placements are possible over the duration of the Program. Clinical placements occur in the province of British Columbia, with the exception of the MIDW 350, 370 and MIDW 380 cluster of electives. MIDW 370 is the Global placement which occurs outside Canada, and MIDW 350 370 are interprofessional placements which may be located outside BC if so desired and possible to arrange.

Clinical Placements			
Year	Course	Weeks	Location
2	MIDW 200	6	BC
	MIDW 240	10	BC
3	MIDW 320	10	BC
	MIDW 322	8	
	MIDW 350 or MIDW 370 or MIDW 380	12	BC or other provinces
		6-8	Uganda or Nepal
		10 (+/-2)	BC or other provinces
4	MIDW 420	11	BC
	MIDW 440	13	
2, 3, 4	MIDW 499	as per need	BC

### Guiding Principles of Placement Allocation

- All placements must be arranged by the Midwifery Program, through the Clinical Placement Coordinator.
- Each student is expected to be in at least two different practices during the program.
- Each student is expected to have to relocate from their home community at least one time (and likely several times) throughout the program.

- All changes to placements, including changes in dates and primary preceptors, must be approved by the Course Lead. Significant changes must be made in consultation with the Midwifery Student Support Committee.
- The program is not able to guarantee that any placements will be available in student's preferred communities.

For further details, please see the [Clinical Placement Allocation Procedure](#).
