

### Electronic Clinical Experience Record (T-Res)

**Students are required to document relevant clinical course experience on T-Res on a weekly basis.<sup>1</sup>**

A Student Orientation Guide to T-Res is found [here](#).

Documentation requirements include:

- Clinic encounters
- Specific clinical skills
- Birth details including
  - Role (primary, assisted or observed)
  - Planned and actual place of birth
  - Transfer of care
  - Continuity of care (attended birth plus an additional 6 other client encounters)
- Reflections

These data will provide ongoing information to the program about student progress and will be used to provide evidence for College registration upon graduation.

#### **Student Responsibilities**

- Students are required to be familiar with the BCCNM [Competencies of Registered Midwives](#).
- Students will generate and save copies of T-Res reports and evaluations for their personal records to track clinical progress at the end of every clinical course.
- Birth numbers must be recorded and up to date on the Evaluation Form by midterm and again at final.

#### **Preceptor Responsibilities**

Preceptors are required to:

- Review the student's clinical experience record (Skills and Birth Logs) on T-Res on a regular basis (weekly is ideal) during the term and verify them where indicated to confirm the supervision of the birth or experience.
- Verify all Birth Logs on T-Res for births attended up to the mid-term and final evaluations.
- Verify Birth numbers and record them on the Evaluation Form at midterm and final.

For definitions see [Defining and Counting Clinical Experiences policy](#).

<sup>1</sup>Students enrolled in MIDW 370 will have limited internet access. They can update their online experience record as soon as internet access is available.
